(Die + Do, 11.30 Uhr am TROPOS)

Datum		Doktorand/in	Thema
October	8	Hoa Phuoc Le, 2.	<i>Aging of wheat and rice straw burning emissions in LEAK chamber</i>
November	12	Matthias Gottschalk, 3.	
November	19	Johannes Stapf, 3.	
December	3	Erik Hoffmann, 3.	
December	5	Andrea Cuesta, 1.	
December	10	Rajesh Vaishnav, 3.	<i>Ionospheric delayed response to solar EUV and UV variations</i>
December	12	Teresa Vogl, 1.	<i>Investigating hemispheric differences in microphysical growth processes in clouds with spectral polarimetric cloud radar observations</i>
December	17	Marie Luttkus, 2.	
December	19	Christoph Geißler, 3.	
January	14	Audrey Tesseire, 1.	
January	23	Junghwa Lee, 1.	<i>The evolution of hydrometeor ratios in clouds: blending of theory, observation, and modeling</i>
January	28	Majid Hajipour, 1.	
January	30	Le Phuoc Hoa, 2.	
February	4	Goutam Choudhury, 1.	<i>Retrieval of cloud condensation nuclei concentrations from spaceborne lidar measurements</i>
February	6	Andrea Cuesta, 1.	
February	25	Michael Lonardi, 1.	<i>Tethered balloon observations of radiative properties of surface and Arctic boundary layer clouds during MOSAiC</i>
February	27	Nadja Samtleben, 3.	
March	3	Athena Floutsi, 2.	
March	5	Vasileios Tzallas, 2.	
March	17	Stephan Lenk, 3.
